CALL FOR PAPERS

As announced in October, the World Future Society will publish a new professional journal: *Futures Research Quarterly*, beginning with the Spring issue of 1985. The goal of this undertaking is to encourage dialogue and interaction among researchers, practitioners and users of futures research, and to facilitate comprehension and application of its approaches and techniques.

A presigious international Editorial Board has been established to perform anonymous review of articles submitted for publication. The decision of the Board as to acceptability is final. The decision as to the potential contribution and significance of a submission to the Journal goal, once it has received a favorable review, is made by the Editors.

Manuscripts should be addressed to *Futures Research Quarterly* at:

World Future Society
4916 St. Elmo Avenue
Bethesda, MD 20814-5089

In order to facilitate anonymous review, all identifying information about the author should be on a separate sheet. Material should be typed, clean copy, double spaced with ample margins. Manuscripts should not normally exceed 6,000 words (about 15 pages). Footnotes should be limited to essential entries and should be typed (double spaced) on a separate page following the last page of text. Tables and graphs should be camera-ready, and placed at the end of the manuscript with an insert notation in the text to indicate approximate placement. Photographs and half-tones cannot be included. The author should retain the original manuscript, since submissions will not normally be returned.

Authors residing within the United States should submit three copies of the article. Overseas contributors may send a single copy if they prefer.
